

Shared assets transmission wireless offering

We are helping you to connect people all over the province

If you're looking to expand your coverage needs, make use of our transmission structures to build and support your network.

Is this offer for you?

If you require the elevation to support your network and want to provide wireless service coverage for your customers and operations, our transmission structures can provide a solution for your needs.

The offer

Leverage BC Hydro's transmission structures for your wireless attachments. By installing on our transmission structures, you will be able to mount several antennas, connected to your nearby control equipment. The entire installation will be powered by BC Hydro—supplied service. If you encounter an issue with your equipment, we will connect you with our maintenance team who can access your transmission structure equipment and work with you to provide a resolution.

SOME GUIDELINES APPLY:

- Customers will enter into a Master Service Agreement with BC Hydro to participate in the Transmission Wireless program.
- Customers will develop site designs in accordance with relevant BC Hydro guidelines and requirements.
- Customers are responsible for obtaining all necessary municipal and federal permits associated with their wireless installation.

Why Choose BC Hydro?

Location is everything

Wherever people go in our province, we are likely already there.

Make use of transmission pole space to reach remote communities with limited network access or take advantage of elevation on transmission towers to get a broader coverage.

Building your Network with us

Leverage BC Hydro assets to build your network

UNDERSTANDING YOUR NEEDS

We will work with you to select the correct structure to meet your needs, and assign a dedicated team to manage your project from start to finish.

PREPARING FOR YOUR INSTALLATION

We will partner with you to make our assets ready for your installations.

CONSTRUCTING YOUR SITE

Once you have all applicable permits in place, our construction team will work with you to safely and efficiently build your transmission solution.
