

**9.10. Conflicting Terms and Conditions**

Whenever anything in these Terms and Conditions is in conflict with any special terms or conditions provided in any Rate Schedule, the terms or conditions provided in the Rate Schedule shall prevail and whenever anything in these Terms and Conditions or in any Rate Schedule is in conflict with the terms of any special contract the terms of such special contract shall prevail.

**9.11. Energy Efficiency Improvement Financing Pilot Program (Vancouver Island)**

Pursuant to section 17.1 of the *Clean Energy Act* and the *Improvement Financing Regulation*, until January 1, 2015 BC Hydro is offering financing to eligible persons for improving the energy efficiency of a building, or a part of a building, located on Vancouver Island (for clarity, this excludes the Gulf Islands and the Sunshine Coast). The terms and conditions under which financing is offered are contained in Electric Tariff Supplement No. 84.

**9.12. Generating Facility Connections (Distributed Generation)**

Customers wishing to interconnect a Generating Facility to BC Hydro's distribution system under Rate Schedule 1289 must pay the associated incremental interconnection costs (if any) in the following circumstances:

- (a) The Customer utilizes a synchronous generator;
- (b) The Customer taking service at a primary potential; and/or
- (c) The Customer utilizes a Generating Facility with a nameplate capacity of greater than 50 kW.

The associated incremental interconnection costs will be determined by comparing the interconnection costs of the Customer's Generating Facility, including any study costs incurred by BC Hydro, to a typical Net Metering customer project application up to 50 kW taking service other than at a primary potential. BC Hydro's Distributed Generation Interconnection Practices provide more detail on interconnection requirements and applicable costs.

Generating Facility means a "Generating Facility" as defined in RS 1289.

Before BC Hydro will provide approval to connect Generating Facility to the grid, the Customer must pay to BC Hydro the actual associated incremental costs for the connection as requested by BC Hydro.
