

ENERGY MANAGEMENT ASSESSMENT

Learn proven techniques for growing your energy savings with this fully funded and convenient assessment.

What could be better than reducing waste and saving money through energy efficiency? How about knowing that you'll find even more ways to save with each passing year? It's called continuous energy improvement, and Power Smart's Energy Management Assessment can help you get there.

Cost savings from one-time projects can fade over the years. Our fully funded, convenient assessment is one way to make sure that your energy management plan continues to support your savings year after year.

Over three hours, our facilitators will lead your senior management team through the workshop at one of your sites. At the end, you'll be equipped with a solid understanding of how you're doing compared to others within your industry and where your best opportunities are hiding. From there, Power Smart's incentives and resources will help you make continuous energy improvement an everyday part of your business.

IS THIS INITIATIVE FOR YOU?

The Energy Management Assessment is available to all customers participating in the Strategic Energy Management Program. Because we fully fund the assessment, we ask that customers make sure that they are able to:

- Commit the appropriate managerial or executive staff to attend.
- Assign an energy champion to carry out your action plan.

KNOW THE SCORE

Get a snapshot of how you're doing and where your best opportunities are hiding.

CONVENIENT AND FREE

Our management assessment is fully funded and held at a location that's convenient to you.

SAVE NOW, SAVE FOR YEARS

The continuous improvement approach will drive savings growth for years to come.

HERE'S WHAT WE OFFER

We offer a free facilitated assessment that can be held at a location that's convenient for your team. We suggest scheduling an assessment every other year to continue to track your successes and update your management plan.

With our facilitators working alongside your senior management team, the assessment will equip you with the following:

- **Energy Management Assessment**
This rates your energy management performance in multiple areas, identifying critical areas for improvement and outlining ways to excel in those areas.
- **Action Plan**
This customized plan will guide your adoption of an integrated approach to energy management. It also introduces the financial incentives and resources that Power Smart offers to assist you in making your plan a reality.
