

HOW ENERGY AMBASSADORS WORKS

1

FORM A TEAM

The Energy Ambassadors team consists of students, a sponsor teacher, a school administrator and a school district facilities mentor.

2

WORKSHOP ONE

Learn about the program and how you can help your school community save resources. Meet with your facilities mentor and tour a school to gather information and data about how schools and districts use energy. This information will help you develop your action plan.

3

INVESTIGATE ENERGY USE

Meet with your team and complete the School Energy Survey. This will give you a snapshot of energy use behaviours in your school.

4

DEVELOP AND DELIVER ACTION PLAN

Your action plan has two options. Which one appeals to you? With your team, decide, develop and deliver an action plan.

5

WORKSHOP TWO

Review your action plan and results. Learn presentation skills for your school board presentation.

6

PRESENTATIONS

Presentations to school board, parent advisory committees and community groups.

7

CELEBRATION

Celebrate what your team has accomplished!
