

POWER SMART PARTNER EXPRESS

Power Smart Partner Express offers you more choices for applying for BC Hydro incentives.

For larger, more complex projects, such as a lighting or mechanical redesign, you can continue to rely on our current Power Smart Partner offerings. But for smaller, simpler retrofits such as lighting upgrades, you can choose to go through Power Smart Partner Express.

It's quick. It's easy. And the incentives are tailored just for you.

CUSTOMIZED, FLEXIBLE AND ACCURATE

With Power Smart Partner Express, you receive incentives based on your hours of operation, not an average based on building type. This means the incentives you receive will accurately reflect your actual energy savings.

We also calculate your incentives based on both your project payback time and level of investment. Projects with longer payback times are eligible for richer incentives.

BENEFITS

- No waiting
- Convenient, self-serve online application
- Immediate online approval
- No signed hard copies required
- Individually measured energy savings
- Tiered incentives that reflect both your true energy savings and your payback time
- Vendors registered with the Power Smart Alliance can fill out the application for you

IS THIS INITIATIVE FOR YOU?

Visit www.bchydro.com/program_eligibility and enter your business account number to determine if Power Smart Partner Express is right for you.

HOW IT WORKS A SIMPLE 5 STEP PROCESS

1 | You go to bchydro.com/express and log in (or register if this is your first visit).

2 | You complete the online application form with the details about your proposed project (or, even easier, have a registered Power Smart Alliance vendor fill out the form for you), including what's there now, what you plan to replace it with, your hours of operation and how much the project will cost.

3 | We automatically calculate your incentive amount while you are completing the online application.

4 | We send you a formal approval by return email that includes the incentive amount and a link to the detailed project information. (Please note: you must receive our email approval first before you initiate any component of your project.)

5 | You complete the project, then return online to submit the final paperwork: a simple project declaration form with invoice reconciliation

6 | You receive your BC Hydro Incentive.
