

ADDENDUM

Number: 4

Issue Date: March 14, 2008

Subject: **Amendment to Schedule A of Appendix 3 – Form of Proposal Letter**
Appendix 5 Update – Fuel Plan
Amendment to EPA Term Sheet

Words and phrases defined in the RFP and used in this Addendum have the meaning given in the RFP, unless otherwise defined herein. References to section numbers mean sections of the RFP, unless otherwise specified.

1. **Amendment to Schedule A of Appendix 3 – Form of Proposal Letter**

The RFP is amended to include a revised and restated Schedule A of Appendix 3 to the RFP, which is issued concurrently with this Addendum and available for download at www.bchydro.com/bioenergycall. Amendments to Schedule A comprise the following:

- (a) A new section 3 concerning hourly GBL profile; and
- (b) An attached example to supplement the information requested in the new section 3; and
- (c) Revisions to Section 1.4 - Escalation.

2. **Appendix 5 Update – Fuel Plan**

On the RFP Website, the Excel document containing Schedules A and B of Appendix 5 has been updated to conform with the PDF version of Appendix 5 as posted. In particular, Schedule B in the Excel document has been updated to substitute the three columns titled “Category A (GJs)”, “Category B (GJs)” and “Category C (GJs)” respectively, with two columns titled “Biomass Fuel (GJs)” and “Auxiliary Fuel (GJs)” respectively.

3. **Amendment to EPA Term Sheet**

The EPA Term Sheet is amended as follows:

- (a) On page 2 of the EPA Term Sheet, in the section titled “Product”, the sub-section titled “Non-Incremental Energy” is deleted and replaced with the following:

“Non-Incremental Energy – BC Hydro will take and pay for energy that results when the hourly load in any single period in a calendar year (i.e., one of the periods in the 3x12 table, such as Off-Peak in January) is less than the corresponding hourly GBL set forth in the Seller’s annual hourly GBL profile, but not exceeding in aggregate in any calendar year an amount equal to 5% of the pre-approved annual GBL.

Except as described in the previous paragraph, BC Hydro will not be obliged to take or pay for energy under this EPA up to Customer’s GBL, or up to an IPP’s existing generation, at the facility at which energy will be delivered under this EPA, in each case applied on an hourly basis.

The Seller, on specified prior notice, may amend its annual hourly GBL profile (but not, for greater certainty, the annual GBL) to re-allocate its annual hourly GBL distribution only once for each calendar year, and subject BC Hydro’s consent.”

- (b) The RFP is amended to include the “Schedule A” referenced at the first bullet of the section titled “Non-Firm Energy” at page 4 of the EPA Term Sheet, which Schedule A is issued concurrently with this Addendum and available for download at www.bchydro.com/bioenergycall.

- (c) The following phrase (i) replaces the bracketed phrase at the top of page 4 of the EPA Term Sheet that immediately follows the table in the section titled “Firm Energy Price”, and (ii) is added as a new paragraph immediately following the table on page 6 in the section titled “Non-Firm Energy”:

“[The above Table provides indicative percentages only. The Table is subject to change prior the deadline for Proposal submissions.]”
