

BC Long-Term Electricity Transmission Inquiry

First Nation Workshop Discussion Guide

July 2009

Using this Discussion Guide

This workbook provides another opportunity for you to give input to BC Hydro and BC Transmission Corporation.

Q: What additional information do you need from BC Hydro and BC Transmission Corporation to participate effectively in this process?

Q: What characteristics of resource options are important to you (e.g. dependable vs. intermittent, cost, clean & renewable, filters that would exclude certain areas from development such as parks, conservancies, sacred sites, known fish bearing streams, etc) ?

Q: What are the key factors that you think will impact the need for new transmission development over the next 30 years (i.e. climate change, economic development in certain areas, population growth, other)?

Additional Comments or Feedback?

If you have a specific question that you would like BC Hydro or BC Transmission Corporation to contact you and follow-up on, please provide your name and contact information.
