

1.0 Reference: BCUC IR #1.2.26

2.1.0 Provide a revised version of the entire section under the "\$/MW-h" heading with all costs (water fees, OMA, interest, return on equity, etc) charged to domestic hydro power production and also to do the same for the natural gas generation and the non-integrated areas generation for all of BC Hydro's self generated power.

RESPONSE:

For BC Hydro owned thermal and hydro generation costs, please see BC Hydro's response to BCUC IR #1.5.3.

For the direct energy costs for the non-integrated areas, please see BC Hydro's response to BCUC IR #1.2.26. The actual and forecast F2003 to F2006 operating expenses for the non-integrated areas are shown in Chapter 7, Page 7-47, Table 7-22.. BC Hydro does not functionally separate the other costs to serve non-integrated areas into generation and distribution costs so this information is not available.
