Report: 29. Peace River Site C Hydro Project - Archaeological Site Reconciliation, Peace River, Fort St. John to Hudson's Hope, B.C.

Prepared by: I.R. Wilson Consultants Ltd.

Summary: The objective of this study was to review and correct recorded heritage site locations in the Site C project area, and to provide recommendations for correction to the Provincial Government's online Remote Access to Archaeological Data application (RAAD). Many of the sites in the area were recorded over 25 years ago, and a number of inaccuracies have been identified in the provincial RAAD application. Archaeologists reviewed original inventory and field forms for previously recorded archaeological sites within the potential Site C project area, and reconciled discrepancies between the descriptive and visual form information RAAD application coordinates.
