

ENERGY MANAGER PROGRAM

POWER SMART PARTNER— COMMERCIAL, GOVERNMENT AND INSTITUTIONAL

INTRODUCTION

As a business owner or manager, you may suspect that energy efficiency opportunities exist in your operations.

However, you may not have the human or financial resources available to identify and implement those opportunities. To overcome this barrier, BC Hydro is providing for Power Smart Partners the Energy Manager Program. BC Hydro will help organizations by subsidizing the compensation package of the qualified individual chosen as your Energy Manager.

An Energy Manager can identify energy efficiency solutions, manage the implementation of energy saving projects, and implement organizational changes to adopt a structured energy management program.

BENEFITS

An Energy Manager will enable your organization to implement an energy management program that ensures optimization of energy dollars while incorporating a culture of energy conservation. This dedicated resource will assist with:

- Benchmarking your facility's energy usage
- Developing an equipment load inventory
- Conducting a walk-through energy survey of your facility
- Creating an energy management plan for your facility
- Establishing a structured energy management program that will deliver sustainable savings into the future
- Preparing budgets and business cases for energy efficiency projects
- Managing the implementation of energy efficiency projects
- Managing of your facility's energy use
- Reducing operating and maintenance costs resulting from energy-saving measures

This opportunity provides organizations access to funding for the purpose of hiring an Energy Manager to help implement a customized energy management program. The results?

An integrated strategic plan that helps organizations achieve energy savings targets and encourages adopting a continuous improvement approach.

BC HYDRO CAN HELP

1. Conduct a management audit of your current energy management practices and procedures. BC Hydro offers the Energy Management Assessment (EMA) free of charge to help customers understand their current energy management program and highlight critical items for improvement.
2. Select a qualified candidate to be your Energy Manager (internal or consultant).
3. Apply for funding.
4. Once your application is approved, you can hire your Energy Manager. BC Hydro will provide funds toward the cost of your Energy Manager.

WHAT ARE THE DELIVERABLES?

- Each quarter, the Energy Manager conducts a presentation based on the outcome of the Energy Management Assessment. During each presentation, discussions are held with BC Hydro to determine if your organization is on track and what additional resources are required to achieve your objectives.
- At the end of the year, the Strategic Energy Management Plan, a quantitative strategic plan to help manage energy efficient initiatives, will be developed by the Energy Manager. This planning document captures future energy efficient projects to ensure you optimize on your energy dollars and projects align with corporate objectives.

At the end of the year, the Energy Manager will have implemented an integrated strategic plan that combines both qualitative and quantitative components to ensure the right energy management program is in place for your organization.

BC Hydro offers three different resources to help an organization implement an energy management program and optimize on energy saving initiatives. This integrated approach allows organization to develop a program on continuous improvement that is sustainable over time.

ENERGY MANAGEMENT ASSESSMENT

- Leadership
- Understanding
- Planning
