

COMPRESSED AIR

Compressed air generation is one of the most expensive utilities in an industrial facility. The average manufacturing plant leaks 20-30% of the compressed air generated.

The average costs of leaks per year are:

Leak size (inches)	Cost for <i>only 10</i> leaks (per year)
1/32 ·	\$1,280
1/16 ·	\$5,230
1/8 ●	\$20,950
1/4 ●	\$83,820
