

WE KNOW HOW TO SPOT THE SAVINGS WHEN IT COMES TO ENERGY EFFICIENCY

BEING POWER SMART MAKES BUSINESS SENSE

For decades, Carousel Cleaners has provided their customers with first class service from start to finish. While looking for ways to improve their customers' experience, Carousel Cleaners decided it was time to upgrade their lighting.

With the help of BC Hydro's Power Smart Product Incentive Program, they replaced their old lights with new energy-efficient lighting, and the changes have been remarkable. The new lighting has improved visibility and comfort levels for employees, plus, it has made the store brighter and more inviting to customers.

Carousel Cleaners not only received a financial incentive through the Power Smart Product Incentive Program, they will also save almost \$400 a year in electricity costs.

Carousel Cleaners can now move on to more pressing matters.
