

British Columbia Utilities Commission Re-issued Information Request No. 1.35.2 Dated: 01 December 2004 BC Hydro Response issued 17 December 2004	Page 1
British Columbia Hydro and Power Authority Call for Tenders for Capacity on Vancouver Island Review of Electricity Purchase Agreement	

35.0 Reference: CFT Report, Appendix G – Addendum 10 to the CFT, p. 1

1.35.2 Please show the projected dispatch of the Tier 1 and Tier 2 solutions in years 5 through 25, considering the planned transmission-side supply projects to Vancouver Island, given Mainland energy costs of 5%, 10% and 15% lower than Tier 1 costs (with adjustments for losses and delivery charges).

RESPONSE:

The expected dispatch does not depend on the assumption made for Mainland energy costs, but on the spread between the gas and electricity price forecasts. Because the model is not driven by Mainland energy costs, the expected dispatch would be the same for all three scenarios.
