

POWER SMART INDUSTRIAL - TRANSMISSION METERING AND INSTRUMENTATION LENDING LIBRARY (MILL)

**If you are not metering,
you are operating blind.**

**Our meter and
instrumentation
equipment will show you
where energy is being
lost, pinpoint systems
and processes that can
be shifted to off-peak
hours and determine
which equipment is not
performing efficiently.**

Overview

Data collection is the only way to understand if your plant is operating efficiently. The MILL can help by providing metering and instrumentation equipment, free of charge, so you can uncover energy-saving opportunities.

Equipment available

- Electrical meters
- Ultrasonic detectors for air leaks
- Process flow meters
- Stroboscopes
- Infrared thermometer
- Infrared thermal camera
- Data loggers

How does it work?

Simply complete a tool request form for the equipment you need. BC Hydro will ship the equipment to you for a three-month loan period. We also offer installation support and access to energy conservation experts all at no cost to you!

Who is eligible?

The MILL is currently available to large industrial electricity users served at transmission voltage. If you are a BC Hydro Transmission customer, you are eligible to borrow from the MILL.

Benefits of MILL

- Identify energy saving opportunities
- Make informed decisions
- Measure energy consumption
- Quantify process opportunities
- Avoid cost of purchasing and maintaining equipment

For more information

To find out more information or to obtain a Tool Request Form, contact your Key Account Manager or call 1 866 453-6400
