

Quick facts

Electric vehicles (EV)

EVs in B.C. use clean electricity as fuel. They have a battery that can be plugged-in to an electrical outlet.

Types of charging stations

DC fast charging station: can charge an EV's battery to 80% in 30 minutes.

Level 2: can charge an EV's battery to 80% in 3 to 6 hours.

Level 1: can fully charge an EV's battery in 11 to 16 hours.
