BC Hydro Clowhom Project Water Use Plan Monitoring Programs Annual Report: 2018

1 Introduction

This document represents a summary of the status and the results of the Clowhom Project Water Use Plan (WUP) monitoring programs to April 30, 2018, as per the Clowhom Order under the *Water Act*, dated April 20, 2005. There are four monitoring programs.

2 Status

The following table outlines the dates that Terms of Reference (TOR) for the Clowhom Project WUP monitoring programs were submitted to and approved by the Comptroller of Water Rights (CWR).

Leave to commence was not received for the COMMON-4 Archaeological Sites Monitoring TOR. As per the October 28, 2005 letter, this work will proceed under the *Heritage Conservation Act*.

Table: 2-1: Dates of Clowhom Project WUP TOR Submissions and Approvals by the Comptroller of Water Rights

Monitoring Program TORs	Order Clause	Original ToR Submission		Most Recent ToR Resubmission	
		Date Submitted	Date Approved	Date Submitted	Date Approved
COMMON-1 Monitor of Aquatic Wildlife in Wetlands Affected by Dam Operations	Schedule A.1.a	Sep 23, 2005	Oct 28, 2005		
COMMON-2 Role of Littoral Zone in Governing Clowhom Reservoir Productivity Capacity	Schedule A.1.b	Sep 23, 2005	Oct 28, 2005	Apr 02, 2015	Apr 23, 2015
COMMON-3 Validation of the Effective Littoral Zone Performance Measure	Schedule A.1.c	Sep 23, 2005	Oct 28, 2005		
COMMON-4 Archaeological Sites Monitoring	Schedule A.2	Sep 23, 2005	Oct 28, 2005		

3 Schedule

The following table outlines the current schedule for the monitoring programs being delivered for the Clowhom Project WUP.

Legend:

- = Project to be undertaken in identified year
- ✓ = Project is completed for the year
- x = Encountered operational or hydrological delays
- X¹ = Work delayed due to program review
- ✓F = All field work for this project is complete. No further field work is planned.

4 Monitoring Programs Terms of Reference

The monitoring programs being implemented under the Clowhom Project WUP are described in Terms of Reference (TOR). These Terms of Reference and the reports for work completed to date can be found here:

5 Status of Monitoring Programs

5.1 COMMON-1 Monitor of Aquatic Wildlife in Wetlands Affected by Dam Operations

The objective of this work is to determine to what extent the ecology (e.g., species diversity) in the wetland at upper end of Clowhom Falls Reservoir is linked to the operation of the reservoir. The wildlife census component of this monitoring program was initiated in 2006 and will be carried out annually over 20 years. The wildlife census field work has been completed for 2017.

The field sampling results for Year 12 (2017) is currently being reviewed and will be submitted in the 2019 annual report.

5.2 COMMON-2 Role of Littoral Zone in Governing Clowhom Reservoir Productivity Capacity

The objective of this 20-year monitoring program is to track changes in fish productivity through sampling of rearing populations. This program was developed and implemented in 2006 to measure if fish productivity has decreased

Fish surveys occurred in alternate years from 2006 to 2010 and are scheduled to occur at five-year intervals thereafter. The last survey was completed in September 2016. The field sampling results for Year 10 (2016) is in draft form and being reviewed and will be submitted in the 2019 annual report.

5.3 COMMON-3 Validation of the Effective Littoral Zone Performance Measure

The objective of this program is to detect changes in the reservoir littoral zone (e.g. the part of the reservoir close to shore) and compare them to model predictions validating performance measures for the different reservoir operational alternatives.

This monitoring program was initiated in 2006 and implemented in consecutive years until 2010 and then at five-year intervals. Data analysis and reporting starting from 2006 and including the 2016 data collection was completed in 2017 and compiled in a 10-year summary report. The report is currently being finalized and will be submitted with the next 2019 annual report.

5.4 COMMON-4 Archaeological Sites Monitoring

This monitoring program was initiated in 2008, was carried out over two years. The objective of this program was to collect additional information about condition and location of sites in the drawdown zone and to monitor site specific impacts due to reservoir operations.

This project is complete.

6 Monitoring Programs Costs

The following table summarizes the Clowhom Project WUP monitoring programs costs approved by the CWR and the Actual Costs to April 30, 2018.
