

# **Puntledge River Water Use Plan**

**Monitoring Program and Physical Works** 

**Annual Report: 2016** 

Implementation Period: July 2013 to November 2016

- PUNMON-1 Assessment of Adult Fish Passage during Pulse Flow Releases
- PUNMON-2 Assessment of Egg Incubation Success in Reach C
- PUNMON-3 Steelhead Production
- PUNMON-4 Evaluating Effects of Ramping Rates on Fish Stranding in Puntledge River (Reach C)
- PUNMON-5 Puntledge River Kayak Pulse Flow Cost-Benefit Analysis
- PUNWORKS-1 Gravel Replacement in the Puntledge River

For Conditional Water Licences 120300, 120301, 120302

# BC Hydro Puntledge River Project Water Use Plan Monitoring Programs and Physical Works Annual Report: 2016

#### 1 Introduction

This document represents a summary of the status and the results of the Puntledge River Water Use Plan (WUP) monitoring programs and physical works to November 30, 2016, as per the Puntledge River Order under the *Water Act*, dated January 19, 2005. There are five monitoring programs and one physical work.

On August 6, 2015, the Comptroller of Water Rights approved the delay of the 2016 Annual Report until December 30, 2016, anticipating an update on the completion of the last remaining project – Puntledge River Gravel Placement project (PUNWORKS-1).

#### 2 Status

The following table outlines the dates that Terms of Reference (TOR) for the Puntledge River WUP monitoring programs and physical works were submitted to and approved by the Comptroller of Water Rights (CWR).

Table: 2-1: Dates of Puntledge River WUP TOR Submissions and Approvals by the Comptroller of Water Rights

| Monitoring Program & Physical Works TOR   | Order Clause      | Original ToR   | Submission    | Most Recent ToR Resubmission |               |  |

Legend:

- Program to be undertaken/initiated in identified year
- = Program completed for the year
- x = Program start delayed
- √F = All field work for this project is complete. No further field work is planned.
- PCR = Project Completion Report submitted.

## 4 Monitoring Programs and Physical Works Terms of Reference

The monitoring programs and physical works being implemented under the Puntledge River WUP are described in Terms of Reference. These Terms of Reference and the reports for work completed to date can be found here:

http://www.bchydro.com/about/sustainability/conservation/water\_use\_planning/vancouver\_island/puntledge\_river.html

## 5 Status of Monitoring Programs

## 5.1 PUNMON-1 Assessment of Adult Fish Passage during Pulse Flow Releases

This monitoring program was initiated in June 2007 and completed September 2010.

## 5.2 PUNMON-2 Assessment of Egg Incubation Success in Reach C

This monitoring program was initiated in August 2006 and completed September 2008.

#### 5.3 PUNMON-3 Steelhead Production

This monitoring program was initiated in January 2006 was completed November 2011.

# 5.4 PUNMON-4 Evaluating Effects of Ramping Rates on Fish Stranding in Puntledge River (Reach C)

This monitoring program was initiated in July 2006 and was completed March 2008.

## 5.5 PUNMON-5 Puntledge River Kayak Pulse Flow Cost-Benefit Analysis

This monitoring program was initiated in June 2006 and was completed April 2011.

## 6 Status of Physical Works

## 6.1 PUNWORKS-1 Gravel Replacement in the Puntledge River

This project is for the placement and periodic maintenance of approximately 2000 square metres of spawning gravel in the Puntledge River which is to be undertaken in consultation with agencies.

The project was deferred for several years pending assessments of an existing spawning habitat restoration project undertaken in Reach B of the Puntledge River in 2005. At the Puntledge WUP Interim Review (December 14, 2011), Fisheries and Oceans Canada (DFO) recommended the gravel placement project go ahead. However, the project was further delayed due to resource constraints at both BC Hydro and DFO in 2012 and 2013. Then in 2014, the project was deferred pending BC Hydro discussions with agencies as part of the Puntledge Fish Entrainment Action Plan. At that time BC Hydro, DFO and the Ministry of Forest, Lands and Natural Resources Office (FLNRO) were considering alternative suitable locations for gravel placement. In December 2014, a recommendation was made by agencies to proceed with the gravel placement as originally planned; however, in developing the Terms of Reference, BC Hydro encountered logistical challenges requiring further investigation.

On July 14, 2016, BC Hydro received approval of a Terms of Reference to determine feasibility and resolve issues associated with the preferred location for the gravel placement. This work is underway and is taking longer than originally anticipated. The Terms of Reference planned for submission in December 2016 will be delayed until next year.

# 7 Monitoring Programs and Physical Works Costs

The following table summarizes the Puntledge River WUP monitoring programs and physical works costs approved by the Comptroller and the Actual Costs to November 30, 2016.

Table 7-1: Puntledge River WUP Monitoring Programs and Physical Works Costs

|  | Costs            |                     | Estimated to | Total Forecast  |                |                                      |                                    |
|--|------------------|---------------------|--------------|-----------------|----------------|--------------------------------------|------------------------------------|
