

What you can expect on your bill

As a net metering customer, the electricity you generate is first used by your home or business. Your net consumption of electricity from BC Hydro is recorded under Inflow. When you generate more electricity than you consume, the excess generation is fed back to the grid and shown under Outflow.

Net electricity usage over time

0%
 no change in daily average inflow compared to the same period last year

26%
 daily average outflow electricity compared to the same period last year

Did you know?

You used a total of 2,955 kWh from Oct 8, 2020 to Dec 8, 2020.

Use our online tracking tools to view your detailed electricity use by the month, week, day or even hour – up to the previous day. Visit bchydro.com/login.

Your net metering this period

As a net metering customer, your smart meter runs in two directions: inflow (electricity from the grid) and outflow (electricity to the grid.) Here is how your net electricity usage is determined:

CUSTOMER GENERATION ACCOUNT
 Previous balance **955 kWh**

Seal up those gaps

Use DIY weather stripping to close gaps around windows and doors to prevent heat loss in the winter, and heat gain in the summer.

As a net metering customer, the electricity you generate is first used by your home or business. Your net consumption of electricity from BC Hydro is recorded under Inflow. When you generate more electricity than your consume, the excess generation is fed back to the grid and shown under Outflow.

- 1 Electricity inflow is 2,955 kWh
- 2 Electricity outflow is 258 kWh
- 3 Previous balance of generation is 955 kWh
- 4 Total amount of electricity to be charged to customer is $2,955 - 258 - 355 = 1,742$ kWh
