March 26, 2026

Hon. Adrian Dix
Minister of Energy and Climate Solutions
PO Box 9060 Stn Prov Govt
Victoria, BC V8W 9E2

Dear Minister Dix:

**RE: British Columbia Hydro and Power Authority (BC Hydro)
Electricity Rate Comparison Annual Report No. 18**

BC Hydro writes to file its Electricity Rate Comparison Annual Report (**Report**) which provides a comparison of BC Hydro's monthly bills and average prices for residential, commercial, and industrial customers with other North American utilities as of April 1, 2025 (**Attachment A**). The Report is prepared in accordance with section 8(4) of the *Clean Energy Act* and the Rate Comparison Regulation (Ministerial Order No. M167) (**Attachment B**).

The Report consists of information taken from the Hydro-Quebec rate survey report titled "*Comparison of Electricity Prices in Major North American Cities*". The Hydro-Quebec report is prepared each year. Monthly bills and average prices are calculated and submitted to Hydro-Quebec by the participating utilities, including BC Hydro, using the rates that are in place as of April 1 of that current year.¹

BC Hydro's Affordable Bills Service Plan performance metric will be achieved, as BC Hydro continues to be in the first (i.e., best) quartile in the residential category (median consumption of 625 kWh), ranking in third. In addition, BC Hydro continues to rank in the first quartile for both the commercial category (median consumption level of 750 kWh; equivalent to the Small Power category in the Hydro-Quebec rate survey report) and the industrial category (largest consumption level of 30,600,000 kWh), placing third in each.

¹ Accordingly, some of the rates used may be interim rates that are approved and in effect at that time. For BC Hydro, the report uses a net bill increase of 3.75% effective April 1, 2025. The Report does not consider customer bill credits provided to BC Hydro customers.

March 26, 2026
Hon. Adrian Dix
British Columbia Hydro and Power Authority (BC Hydro)
Electricity Rate Comparison Annual Report No. 18

Compared to last year, all three customer categories (residential, commercial, and industrial) remain in the same ranking positions.

Yours sincerely,

Glen Clark
Chair, Board of Directors

Monthly Bills and Average Prices as at April 1, 2025

This is the 18th Electricity Rate Comparison Annual Report (**Report**) prepared by BC Hydro in accordance with section 8(4) of the *Clean Energy Act* and the Rate Comparison Regulation pursuant to Ministerial Order No. M167¹. The Report provides a comparison of BC Hydro's monthly bills and average prices for residential, commercial and industrial customers with other North American utilities, including those in Alberta, Quebec, Ontario, Manitoba, Washington, Oregon, and California, in Canadian funds.²

Each year BC Hydro participates in the Hydro-Quebec rate comparison survey, submitting bill calculations based on electricity prices that are in place as of April 1 of the current year.³ Hydro-Quebec compiles the information and provides the monthly bills and average prices for 12 Canadian utilities and 10 American utilities in an annual report. The Report provides survey information taken from the Hydro-Quebec report titled Comparison of Electricity Prices in Major North American Cities.⁴

The Hydro-Quebec report provides the monthly bills, excluding taxes and non-utility levies, calculated for specific consumption points for four different customer segments: residential, small power, medium power and large power. The average price is also calculated for each customer segment and consumption point, by dividing the monthly bill against the amount of monthly energy consumption. For example, if an electric bill for 1,000 kWh was calculated to be a monthly amount of \$100, the average price would be \$100 divided by 1,000 kWh, or 10 cents/kWh.

¹ The first Electricity Rate Comparison Annual Report was issued on June 10, 2009 pursuant to Ministerial Order No. M114, which was subsequently replaced by Ministerial Order No. M167.

² Monthly bills and average prices for American utilities have been converted to Canadian dollars using the exchange rate of \$0.6970 (C\$1 = US\$0.6970), which is the rate in effect at 12 p.m. Eastern on April 1, 2025.

³ Some of the rates used may be interim rates that are approved and in effect at that time. In addition, the bill calculations do not consider customer bill credits provided to BC Hydro customers.

⁴ [Hydro Quebec Comparison of Electricity Prices in Major North American Cities Report.](#)

Based on the data from the Hydro-Quebec survey, BC Hydro's monthly bills and average prices for the residential, small, medium and large power categories are in the first (i.e., lowest rate) quartile of the public utilities surveyed. These low rates provide a competitive advantage to these customer segments in BC Hydro's service area. [Table 1](#) below summarizes BC Hydro's rankings against the 21 other utilities from the Hydro-Quebec survey.

The monthly bills for customers are presented in [Table 2](#), [Table 3](#), [Table 4](#), and [Table 5](#). The average prices for customers are presented in [Table 6](#), [Table 7](#), [Table 8](#), and [Table 9](#). BC Hydro's ranking in comparison to the top five participating utilities with the lowest monthly bills and average prices are provided in Tables 2 to 9. BC Hydro's monthly bills and average prices over the past five years are summarized in [Table 10](#) and [Table 11](#).

The Hydro-Quebec residential segment includes calculations for BC Hydro's residential customers. The Hydro-Quebec small power segment includes calculations for BC Hydro's general service customers who are under 100 kW, while the medium power segment includes calculations for BC Hydro's general service customers between 100 kW and 5,000 kW. Lastly, the Hydro-Quebec large power segment includes calculations for BC Hydro's general service and transmission service customers who are 5,000 kW and over. [Table 12](#) shows the specific BC Hydro rate schedules that have been included in each Hydro-Quebec segment. [Table 13](#) summarizes BC Hydro's relative rankings in each rate class in the current and the last five years of participation in the survey.

Table 1 BC Hydro's Current Year Rankings in the Hydro-Quebec Survey, Out of 22 Utilities Surveyed

Rate Class & Usage	Ranking as of April 1, 2025
Residential	
625 kWh	3
750 kWh	3
1,000 kWh	3
2,000 kWh	4
3,000 kWh	5
Small Power

1) Rates used reflect a 1.01 per cent interim net bill decrease effective April 1, 2020 (Compliance filing net bill decrease was 1.62 per cent).

2) Rates used reflect a 1.16 per cent interim net bill increase effective April 1, 2021 (Compliance filing net bill increase was 1.00 per cent).

3) Rates used reflect a 1.39 per cent interim net bill decrease effective April 1, 2022 (Compliance filing net bill decrease was 1.23 per cent).

4) Rates used reflect a 2.00 per cent interim net bill increase effective April 1, 2023 (Compliance filing net bill increase was 2.20 per cent).

5) Rates used reflect a 2.34 per cent final net bill increase effective April 1, 2024.

6) Rates used reflect a 3.75 per cent final net bill increase effective April 1, 2025.

Note: Bill calculations exclude taxes and non-utility levies, and include the Deferral Account Rate Rider and Trade Income Rate Rider.

- For rates starting April 1, 2020 (fiscal 2021) and April 1, 2021 (fiscal 2022), there were no applicable rate riders.
- For rates starting April 1, 2022 (fiscal 2023), the Deferral Account Rate Rider was (2.0)%.
- For rates starting April 1, 2023 (fiscal 2024), the Deferral Account Rate Rider was (1.0)%.
- For rates starting April 1, 2024 (fiscal 2025), the Deferral Account Rate Rider was (2.5)% and the Trade Income Rate Rider was (2.3)%.
- For rates starting April 1, 2025 (fiscal 2026), the Deferral Account Rate Rider was (4.5)% and the Trade Income Rate Rider was 0%.

**BC Hydro Electricity Rate Comparison
Annual Report**

Report No. 18

Attachment B

Ministerial Order No. M 167

PROVINCE OF BRITISH COLUMBIA
REGULATION OF THE MINISTER OF ENERGY AND MINES
AND MINISTER RESPONSIBLE FOR HOUSING

Clean Energy Act

Ministerial Order No. M 167

I, Rich Coleman, Minister of Energy and Mines and Minister Responsible for Housing, order that the Rate Comparison Regulation, B.C. Reg. 140/2009, is repealed, and the following Rate Comparison Regulation is made.

RATE COMPARISON REGULATION

Definition

1 In this regulation:

"Act" means the *Clean Energy Act*;

"applicable rates" means, with respect to a public utility's electricity rates, the average monthly bill for electricity, but not any other terms and conditions of those rates.

Report requirements

- 2 In a report to be provided to the minister under section 8 (4) of the Act, the authority must do all of the following:
- (a) include a comparison with at least one public utility in each of at least fifteen other jurisdictions in North America, including all of the following:
 - (i) the provinces of Alberta, Quebec, Ontario and Manitoba;
 - (ii) the states of Washington, Oregon and California;
 - (b) compare the previous year's applicable rates for residential, commercial and industrial customers with similar rates of the public utilities referred to in paragraph (a);
 - (c) express the monetary comparisons in Canadian currency;
 - (d) provide the authority's previous 5 years of applicable rates.

JUN 28 2011
Date

A handwritten signature in black ink, appearing to be "Rich Coleman".

Minister of Energy and Mines and Minister
Responsible for Housing

(This part is for administrative purposes only and is not part of the Order.)

Authority under which Order is made:

Act and section: *Clean Energy Act*, S.B.C. 2010, c. 22, s. 37 (f)

Other: *Utilities Commission Act*, R.S.B.C. 1996, c. 473, s. 125.1 (4) (c); M114/2009
