March 7, 2019

Mr. Patrick Wruck Commission Secretary and Manager Regulatory Support British Columbia Utilities Commission Suite 410, 900 Howe Street Vancouver, BC V6Z 2N3

Dear Mr. Wruck:

### RE: British Columbia Utilities Commission (BCUC or Commission) British Columbia Hydro and Power Authority (BC Hydro) Fiscal 2020 to Fiscal 2021 Revenue Requirements Application (the Application)

BC Hydro writes to provide Supplemental Information No. 1 to the Application, which contains:

- An updated version of Figure 9-2 which appears on Page 9-4 of the Application. The updated version includes additional information that was accidentally omitted in the original.
- Columns E, F, G and J of pages 1, 2 and 3 in the Generation section of Appendix I, Attachment 1 of the Application. These columns were accidentally omitted in the original. As Appendix I, Attachment 1 contains confidential information, BC Hydro will also submit a confidential version of this update under separate cover.

For further information, please contact Chris Sandve at 604-974-4641 or by email at <u>bchydroregulatorygroup@bchydro.com</u>.

Yours sincerely,

anthea Jult

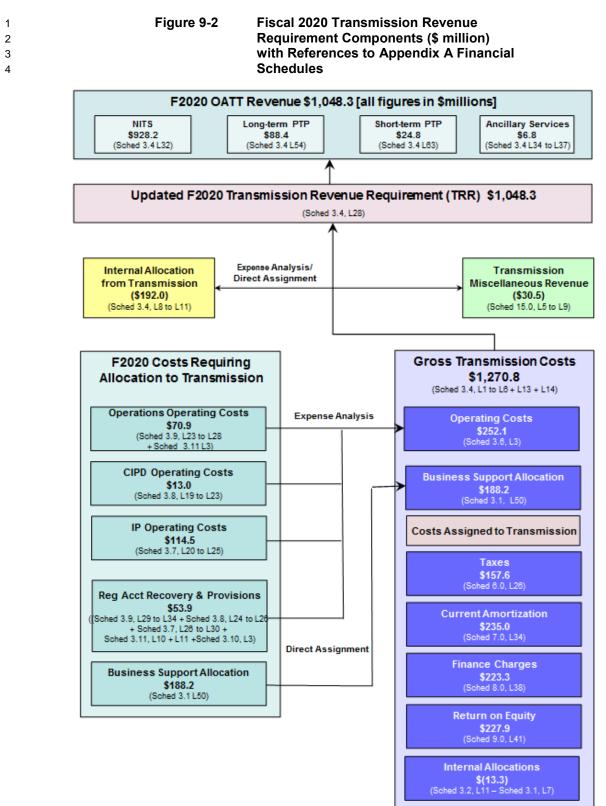

(for) Fred James Chief Regulatory Officer

	TOTAL Diesel											7.9	5.8			8.7	5.0					
	Thermal																					
	Add: Projects & Programs Less than \$5M											3.8	6.1			6.6	4.5			-		
	TOTAL Thermal											3.8	6.1			6.6	4.5					
	Generation Total											305.8	371.5			357.0	500.6					
	Portfolio Delivery Adjustment											8.9	(74.6)			(11.9)	(65.2)					
													L									
	Total											314.7	297.0			345.1	435.5					

Note a: Given the nature of the project, a definition phase was not undertaken.

Note b: In the F17-F19 RRA, the Name of this Project was Puntledge Flow Control Improvements.

### Notes:

(1) Information provided is current as of the established 'Currency Date' which is April 1, 2018. Information for certain projects in progress has been updated for significant events subsequent to this date.

(2) Some projects that are in service or forecast to be in service at the end of fiscal 2019 may have trailing expenditures that result in capital additions in the test period. These expenditures and associated capital additions have been aggregated and included in the line item "Projects less than \$5 million".

(3) Project / Program dollars are generally capitalized starting either in the feasibility stage of Identification phase or in the Definition phase.

(4) Forecast ISD is the expected in-service date (as at the Currency Date) when the project goes into service.

(5) Start Date of Construction is the Implementation Approval Date. For projects in Definition, the Start of Construction is the forecasted Implementation approval date.

(6) Fiscal Year that the project received Definition phase approval.

(7) Implementation Approval \$ refers to the 'Authorized' total capital cost of the project when it was first approved by BC Hydro for Implementation.

(8) Pre-Implementation phases are: Future, Identification and Definition. See Chapter 6, section 6.4.7.4 to 6.4.7.7 for further discussion on pre-Implementation cost estimates are provided where an engineering estimate is available. Engineering estimates are generally completed during the mid-stage of Identification phase. N/A indicates that an engineering estimate is not yet available, or that the project is in Implementation phase.

(9) Amounts reflect only the capital portion of the Authorized amount.

(10) Implementation Approval ISD refers to the in-service date identified when the project was first approved by BC Hydro for Implementation.

(11) Project meets the current threshold for a CPCN or Section 44.2 Application based on the Project Authorized Cost Amount, or may meet the threshold, based on the planning cost allowance or cost estimate as of the Currency Date (See Note 1), or in accordance with BCUC Direction No. G-47-18.

Use of To Be Determined (TBD): For projects in Future or Identification phase, To be Determined (TBD) is provided for the Pre Implementation Cost Estimate, Forecast In-Service Date (ISD) and Start Date of Construction, for the following reasons: For Future phase projects, a problem or opportunity has been identified, but the required response has not yet been determined. In Identification phase, a number of identification phase are being investigated, and each alternative can result in very different project scope, schedule and cost. As a result, Pre-Implementation Cost Estimate, Forecast In-Service Date (ISD) and Start of Construction Date are generally only provided for projects in the Definition phases.

Fiscal 2020 to Fiscal 2021 **Revenue Requirements Application** [Supplemental - March 7, 2019]

## **Appendix I - Attachment 1**
