

BC Hydro is dedicated to safely providing reliable, affordable, and clean electricity throughout B.C. To ensure safety and compliance, contractors working for or intending to work for BC Hydro must adhere to WorkSafeBC and other relevant legislative and regulatory safety practices. BC Hydro has partnered with Alcumus SafeContractor to review, assess, and ensure that our contractor community maintains robust safety management programs and practices.

### Key Points for Bidding on BC Hydro Contracts:

1. **Alcumus SafeContractor Qualification:** The requirement for SafeContractor qualification is based on the safety risk level of the work, as determined by the WorkSafeBC's Assigned Hazard Rating List.

2. **Bidding on work:**

If BC Hydro indicates that Alcumus SafeContractor is required as part of the bidding process please note:

- If you are not currently subscribed to Alcumus SafeContractor, there is no cost to sign up and bid on work for BC Hydro.
- If you are already subscribed to Alcumus SafeContractor at a Standard Health and Safety level (minimum), you need to connect your profile with BC Hydro and include a copy of your certification with your bid.

3. **Subscription to Alcumus SafeContractor:**

- BC Hydro requires subscription to Alcumus SafeContractor - Standard Health and Safety level for all awarded contracts with work rated as Moderate or High safety risk, regardless of company size. This cost is not covered by BC Hydro.

4. **Subscription Costs:**

- Subscription costs may vary based on supplier size, membership type, and connection to Alcumus SafeContractor clients.
- Suppliers can contact Alcumus SafeContractor directly for information on subscription costs if awarded a contract.
- Email: [Register@safecontractor.ca](mailto:Register@safecontractor.ca)
- Phone: 1-877-746-5653

**Note:** There are no retroactive requirements for existing contracts.
