

Schedule 04

Reactive Supply and Voltage Control from Generation or Other Sources Services

Preamble	In order to maintain transmission voltages on BC Hydro's Transmission System within acceptable limits, generation facilities and non-generation resources capable of providing this service that are under the control of the control area operator are operated to produce (or absorb) reactive power. Thus, Reactive Supply and Voltage Control from Generation Sources Service must be provided for each transaction on BC Hydro's Transmission System. The amount of Reactive Supply and Voltage Control from Generation or other Sources and Service that must be supplied with respect to the Transmission Customer's transaction will be determined based on the reactive power support necessary to maintain transmission voltages within limits that are generally accepted in the region.
Availability	In support of Network Integration Transmission Services, Long and Short-Term Firm Point-to-Point Transmission Service, and Non-Firm Point-to-Point Transmission Service.
Rate	\$0.825 per MW of Reserved Capacity per hour.
Taxes	The Rate and Charges contained herein is exclusive of applicable taxes.
Note	A description of the methodology for discounting Reactive Supply and Voltage Control from Generation or other Sources Services provided under this Schedule is contained in Section 3 of the BC Hydro OATT.
