Distribution Engineering

Project Name and Customer Name	
Address	
Reference Documents	
Extent of Work	
Customer’s Consultant	
Customer’s PoR	
BC Hydro’s Designer or Project Manager	
BC Hydro Distribution Engineering Department Representative	
Date	

NOTES:

- i. This letter must be completed by the Customer’s PoR and submitted to BC Hydro DE Representative within 10 days of final field review.
- ii. This letter of assurance is used to confirm EGBC compliance of field review during construction, and construction compliance to the design intent of the Customer’s PoR’s engineering documents including drawings. It is not intended to supersede or replace any existing BC Hydro processes, documentation, or requirements.

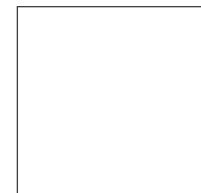

I hereby give assurance to BC Hydro that

- a. I am a Professional Registrant with EGBC and am registered and licensed to practice as a professional engineer under the Professional Governance Act.
- b. I am the registered Professional of Record for the project work outlined above.
- c. I am a member of the above listed firm and I sign this letter on behalf of the firm.
- d. I have fulfilled my obligations as the PoR for this work, including but not limited to
 - 1. Coordination and completion of field reviews as outlined by EGBC’s Quality Management Guidelines—Documented Field Reviews During Implementation or Construction
 - 2. Confirmation all components of the project which I am responsible for such as materials, construction, and safety, substantially meet my design intent.
 - 3. Commitment to provide signed and sealed record drawings to BC Hydro

Each Registered Professional shall complete the following:
