BC Hydro appliance rebates are back! October 3, 2025–January 2, 2026

BC Hydro is promoting energy efficiency by offering instant discounts on select ENERGY STAR® appliances **October 3, 2025–January 2, 2026**. BC Hydro only supplies rebates on the most efficient ENERGY STAR® appliances, which ensures that customers will get maximum energy savings with every use.

Instant in-store offers

Customers who purchase qualifying appliances can be eligible for the following rebates:

Instant Discount Offer:

- Receive **up to \$150 off** select ENERGY STAR® appliances purchased between October 3, 2025 and January 2, 2026.

Additional Details:

- Eligible appliances must be listed on the Qualified Product List published by BC Hydro at bchydro.com/deals
- Eligible appliances must be listed on the ENERGY STAR® product finder
- **Limit:** 2 appliances per SKU per customer.
- Rebates are available to BC Hydro residential customers living in BC Hydro's service territory.
- All products must be new (no open box or refurbished products allowed).
- Rebate is per appliance.

Appliance Type	BC Hydro Rebate	Qualifying Details

Instant In-Store Discount Details

How It Works:

Customers receive an immediate discount at the point of sale, applied to the **after-tax price** of qualifying products at participating retailers.

- BC Hydro rebate offers are programmed into the POS system from head office.
- The discount is automatically deducted from the customer's bill at the time of purchase.

Self-Checkout Stations:

- Ensure discounts are applied during self-checkout.
- Attendants may need to approve the discount from their main station or assist customers directly.

Merchandising Requirements:

- All POP (Point-of-Purchase) material will be shipped directly to store.
- Display period: **October 3, 2025–January 2, 2026**.
- BC Hydro Retail Representatives will be in stores starting **October 3** to ensure timely and accurate merchandising of qualifying products.

Where Available:

- In-store and online purchases at participating locations.

Payment Method:

- Discount is applied **instantly at checkout**.

BC Hydro Time of Day Pricing

Pay less during off-peak hours

Time-of-day pricing is ideal for residential customers who can shift their electricity use to off-peak hours—especially those with energy-efficient appliances that can be scheduled to run between 11 p.m. and 7 a.m.

With this pricing model, electricity costs more during peak evening hours and less overnight, helping you save when you use power during low-demand times.

Visit bchydro.com/timeofday for more details and to try the rate estimator tool.

Merchandising Instructions

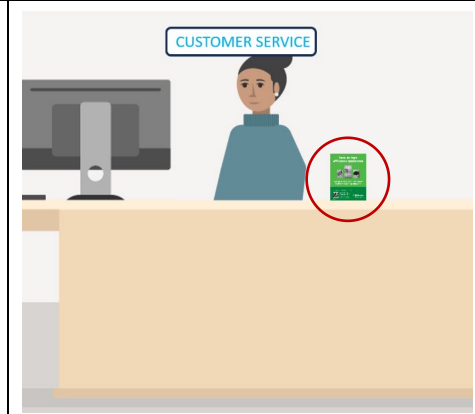

All signage must be displayed from **October 3, 2025–January 2, 2026**. BC Hydro Retail Representatives will be in stores starting **October 3rd** to confirm accurate and timely execution.

Name/Image	Display On	Best Practices
<p>BC Hydro Cling</p> 	<p>Apply the appropriate BC Hydro price cling to each appliance, ensuring consistent placement across all units.</p>	
<p>Appliance Rebate Tent Card</p> 	<p>Appliance rebate tent cards should be placed on counters near appliances or at service desks to draw customer attention and highlight key messages.</p>	
<p>TOD Tent Card</p> 	<p>Tent cards should be placed on counters near appliances or at service desks to draw customer attention and highlight key messages.</p>	

Cardboard Standee

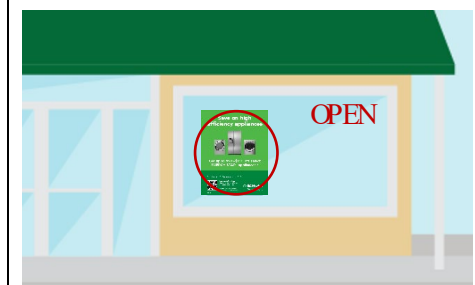

Cardboard standees can be placed in various high-traffic areas to capture customer attention, such as near appliance computer stations, service counters, or cash desks.

Posters

Install posters in your designated in-store display areas, such as the store entrance and other high-traffic zones. Some stores may have poster holders or T-stands available for use—ensure posters are securely and visibly placed.

Fall 2025 eligible appliances

BC Hydro instant discounts are available only for purchase at the participating retailers listed during promotional period of October 3, 2025 – January 2, 2026.
