

Air Fryer Quick Reference

Use this fact sheet to quickly reference BC Hydro rebates on air fryers.

From **October 2, 2026 to March 5, 2027**, BC Hydro will be providing instant rebates on select air fryers at participating retailers. Air fryers provide a healthier and more energy-efficient way to cook every day meals. For a full list of eligible products and additional offers, visit bchydro.com/deals starting October 2.

In-store or online instant rebate at select retailers:

- **\$25** off select air fryers purchased between **October 2, 2026 to March 5, 2027**.
- Instant Rebate applied at checkout

Eligible products:

- Single & dual basket air fryers only
- Retail price minimum: \$50 or more/unit
- Not eligible: additional functions such as, frying, grilling, toaster oven, multi-cooker, and other combo air fryers

Additional criteria:

- Eligible products must be listed on the Qualified Product List published by BC Hydro at bchydro.com/deals
- Rebates are available to BC Hydro and City of New Westminster residential customers within BC Hydro's service territory
- Maximum one unit per SKU per customer transaction
- Rebate applies to new products only
- Rebate is per eligible air fryer and is provided by BC Hydro

Why choose an air fryer?

Energy Savings

- Air fryers can use up to 50% less energy than a conventional oven when cooking small meals because they heat a smaller cooking space and cook food faster.

Popular Choice

- 47% of households already own an air fryer
- Air fryers are used an average of 2.55 days per week
- Households that use an air fryer regularly can save approximately 100 kWh per year by reducing oven use

Choosing the Right Air Fryer

- When choosing an air fryer, consider your household size, whether a single or dual basket model best suits your needs, your typical cooking habits and portion sizes, and the amount of available counter space.

Health & Safety Considerations

Customers concerned about cooking-surface materials can:

- Select models with glass or stainless-steel baskets
- Inspect baskets regularly and replace appliances if protective coatings become damaged

Frequently asked questions:

1. How do I know if an air fryer qualifies for a rebate?

To be eligible, the air fryer must be listed on BC Hydro's Qualified Product List and meet all program requirements. Visit bchydro.com/deals for a list of eligible models.

2. Do I need to submit a rebate application?

No. The rebate is applied instantly at checkout when purchasing an eligible air fryer from a participating retailer.

3. Is an air fryer really more energy efficient?

Yes. Air fryers can use up to 50% less energy than a conventional oven when cooking small meals because they heat a smaller space and cook food faster.

4. What size air fryer should I choose?

Consider your household size, whether a single or dual basket model best suits your needs, your typical cooking habits and portion sizes, and the amount of available counter space.

5. Why are some air fryers more expensive than others?

Factors such as brand, basket size, materials, and advanced features or technologies can all contribute to the cost of an air fryer.
