

# Self-generation program

LAST UPDATED:  
2025-05-16

## Commonly used inverter list

This is a list of commonly used inverters that have come through the self-generation (previously net metering) program, and are not intended to be an exhaustive list. If the inverter you'd like to use is not listed below, please submit the inverter datasheet with certification information as part of your [self-generation application](#).

Note that grid interactive photovoltaic inverters must be certified under CSA C22.2 No. 107.1, comply with rules in CSA 22.3 No. 9:20, and are equipped with anti-islanding protection per CEC Part I, rule 84-008.

\* Tesla models are no longer eligible for the battery rebate as of March 12, 2025. Customers who submitted a self-generation and rebate application before March 12, 2025 and were accepted to proceed via technical acceptance, will be eligible for the rebate. Product purchase, installation and invoice date must be prior to March 12, 2025.
