

## Construction Update

### Fraser Highway and 166 Street, Surrey

**October 3, 2025**

We're working closely with the Surrey Langley SkyTrain Project team to accommodate the rapid transit extension from Surrey to Langley. This work includes the installation of new electrical poles and duct bank to accommodate the relocation of power lines from the north side of Fraser Highway to the south side.

A duct bank is a series of plastic conduits encased in concrete that house and protect underground cables.

This work will take place within the construction zones already in place for Surrey Langley SkyTrain construction. Our crews will work on the south side of Fraser Highway before the 166 Street intersection (see map on page 2 for specific location).

**Where:** Fraser Highway and 166 Street, in Surrey.

**When:** Anticipated to start on **October 8**, with a targeted completion by the end of the week.

**Working Hours:** Monday to Saturday from 7 a.m. to 5 p.m.

A planned outage on October 8 (9 a.m. to 6 p.m.) is required to safely complete this work. Affected BC Hydro account holders will receive a separate notification (auto-dialer and email). Please ensure your account contact information is up to date.

Safety is our top priority. Traffic is reduced to a single lane in each direction along Fraser Highway. Access to 166 Street off Fraser Highway will be maintained (see map on page 2).

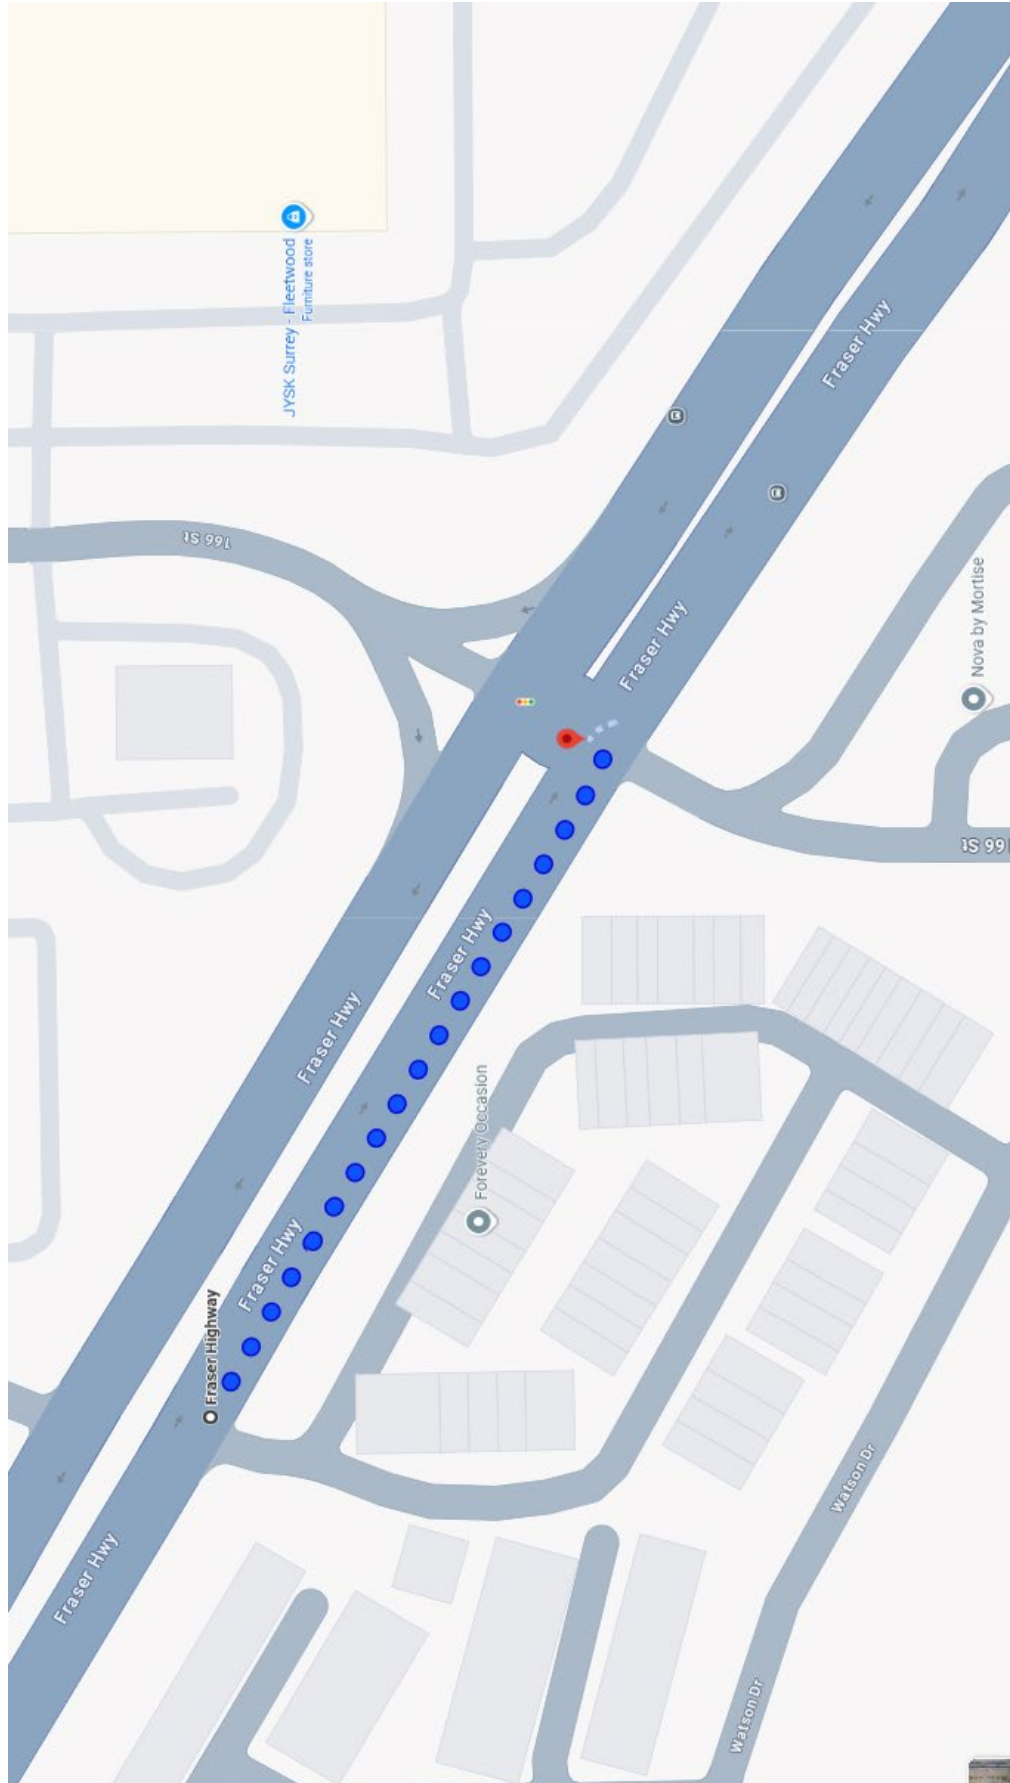

Sidewalks, bike lanes and bus stops on this route will be impacted and may not be available. Please follow the on-site signage provided by TransLink and the direction of the crew on site.

Drivers are advised to plan ahead and expect delays. Please reduce speed in the construction zone and follow the directions of traffic control personnel and posted signage. Cyclists are advised to look for [alternative bike routes](#) while work is underway on Fraser Highway.
