West End Substation: update to construction timeline

Dear Neighbour,

We recently updated the West End Substation project schedule and are now working towards starting construction in late 2026, with completion expected in late 2031.

This brings forward the start of construction by one year from our previous estimate. Advancing our timeline will deliver a safe, modern substation for your community sooner, and deliver cost savings that benefit all ratepayers.

We'll continue working with you

We understand that you continue to have questions about our project and we'll keep working with you to – and through – construction.

In the coming months, we expect to share information with you about how the substation design has advanced, where we'll locate new power lines to bring electricity into and out of the substation, and what construction will look like. We'll also recruit for our Community Construction Liaison Committee to support two-way communications with those of you who live, work and play here.

Please reach out with any questions

If you have any questions about this update, or the West End Substation project in general, please reach out to me at **604.341.1304** or westendsub@bchydro.com.

Warm regards,

Fay Kramer
