

**BC Hydro - West End Substation Project - Power Lines**

## NOTICE OF CONSTRUCTION

On two Saturdays in April and May, our contractor will be working on Dunsmuir Street to help us understand ground conditions. We'll use this information to plan for safe and efficient construction of new power lines in the coming years.

**When:** Saturday, April 25 and May 2

**Hours:** between 7 a.m. and 8 p.m.

**Where:** Dunsmuir Street at the intersection with Richards Street

**What:** daylighting work, that is: cutting through the road covering, removing this covering, excavating small holes to shallow depths to identify underground utilities and install monitoring equipment, then refilling the holes and restoring the roadway

**Impacts:** Dunsmuir road traffic will be reduced to a single lane between Homer and Richards

Richards road traffic will be reduced to a single lane between Pender and Dunsmuir

parking will not be permitted on the 500 block of Richards Street – street parking is available on adjacent streets

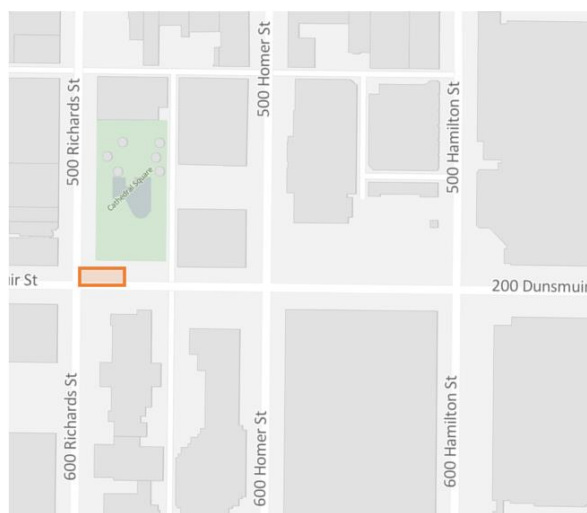

bike routes will be maintained around the construction zone

the Dunsmuir bike rack will remain accessible for rentals, accessed from the roadway rather than the bike lane

sidewalks immediately adjacent to the construction zone will be closed – signage and flaggers will direct pedestrians to alternative walkways

**For your safety, and that of our workers, please follow posted traffic signs and directions from crews.**
