## SAVARY ISLAND COMMUNITY WORKSHOPS

---

**Some Things to  
Think About  
Before the  
Workshop**

- What is your vision for the future of Savary Island? How can BC Hydro electricity support your vision?
- Which of the following values do you feel is most important for Savary Island? Are there any others?
  - Increasing local economic opportunities & development
  - Maintaining my current way of life
  - Maintaining energy self-sufficiency/independence
  - Improved community services/amenities (water, electricity, roads, waste management, etc.)
  - Protecting the local environment
  - Reducing on-island GHG emissions
  - Supporting an aging population
  - Limiting population growth
  - Encouraging population growth
- For what reasons do you support or oppose BC Hydro service on Savary Island?
- How do you see Savary Island changing if the community decides to go ahead with BC Hydro service?
- How do you generate electricity at your home on Savary Island? How do most people generate electricity?
- How many hours do you run your generator in a week when you're on Savary? In a month?
- What items do you have on Savary Island that require electricity?
