90.0  Reference:  BC Hydro Response to BCUC Information Request 1.55

1.90.0(c)  What is BC Hydro’s latest impact of industrial and total conservation potential, as defined in its conservation potential update report, taking stepped rates into account?

RESPONSE:

The stepped rate does not impact the total economic conservation potential, which is determined by the Cost of Conserved Energy.

Appendix A in the Power Smart 10-Year plan (Volume 2, Appendix I) estimates the impact of stepped rates on Power Smart expenditures.
